

Our National CORE Platform

1. Our mission is to complete the Civil Rights Movement set out by past civil rights organizations and envisioned by Dr. Martin Luther King, "Judging the person not by the color of their skin, but by the content of their character." HOW: Ween single parents from Welfare and encourage the father to stay and raise their children. Provide the tools necessary for the father to learn a trade and go to college. Have a local pastor invite the parents to attend church services.
2. Fight the legalization of Marijuana and other illegal drugs in all 50 states. Call out politicians like Gavin Newsome who accepted \$500,000.00 in campaign money from Marijuana interests groups and Senator Cory Booker who is sponsoring a bill to legalize Marijuana in all 50 states. Work with city, state, private agencies and churches to find solutions in identifying ways for users to "Kick the Habit"
3. Challenge the NAACP as the definitive group representing black interests.
4. In California National CORE will be investigating and identify where substandard schools are located such as in Los Angeles and in other cities where the drop-out rate is high. National CORE will be demanding that the public schools raise their standards or if they do not National CORE will encourage and assist in implementing school choice or school vouchers.
5. Many African Americans of South/Central areas are either homeless and or are unemployed. National CORE will work with city, state and private agencies and churches to address the high unemployment and homelessness and locate and find solutions.
6. National CORE will be starting Civic classes including U.S. History in California for legal immigrants, Dreamers and other undocumented immigrants who have been in the country and are patriotic and desire to assimilate. National CORE will be applying for the Citizenship and Assimilation Grant Program," so they can play an active role in preparing immigrants for citizenship.
7. National CORE does not believe that Dreamers and other illegal immigrants be deported if they have attended and graduated from high schools, own a home and are working. National CORE does agree that immigrants with serious criminal records should be deported to their home country.
8. National CORE is a pro-life organization and believes that Planned Parenthood must be defunded by the U.S. Government.
9. Lastly; National CORE will put pressure on U.S. House Representatives and Senators to pass a bill that the President will sign into law that protects Pastors and other Ministers who refuse to marry gay couples from civil and criminal liability, and preserves Christian monuments in the public square.
